New trap and lure formulations for *Rhagoletis* species and olive fruit fly

Darek Czokajlo and Philipp Kirsch
IPM Tech, Portland, OR

Keywords: Cherry fruit fly, apple maggot, olive fruit fly, trap and lure formulations

Abstract: IPM Tech has developed and tested novel controlled release formulations for known attractants and tested these in novel yellow sticky trap designs, targeting cherry fruit fly in Montana, apple maggot in Washington and Oregon and olive fruit fly in California. Results will be presented from the 2002 trapping season.
