Last Call CM: Effective codling moth control in apple orchards in British Columbia

Philipp Kirsch, Ken Shukin and Gerhard Gries
IPM Tech, Portland, OR

Keywords: Last Call CM, codling moth, apple, British Columbia

Abstract: Last Call CM was evaluated in several different apple orchards in 2001 in British Columbia. Last Call supplied excellent protection from CM attack equal to that of conventional OP programs and the alternative SIR programs. Last Call CM proved to be very complementary to other tactics deployed within the SIR program.
